### ▲ 2060 SCUBA FIN

The design of the 2060 is to maximise power with the least amount of effort. With its bigger contact surface, it can direct water along the channels and ridges to provide stability and efficiency with every stroke. Quick release buckles are standard for this model, but technical divers can choose to swap these for a pair of EZ spring fin straps.

### ▲ 9700 TORNADO

An inexpensive yet fully loaded BC describes the Tornado perfectly. Made from 1,000 cordura, the Tornado has four weight dump pockets, three zippered pockets for storing accessories, and an adjustable waistband for extra comfort and fit. It also comes in XXS for kids and extremely small people.
